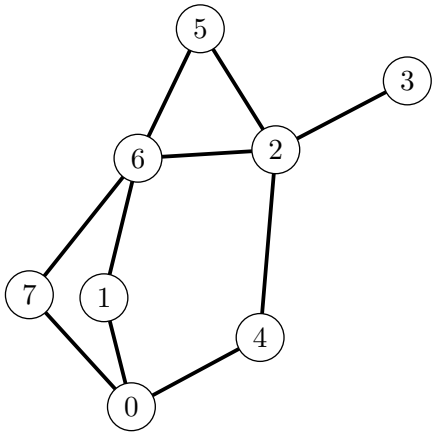
Question 1. Draw a BFS tree rooted at vertex 3 for the graph pictured bellow. Identify the parent child relation for each vertex and write the level of each vertex.



Question 2. For the graph with incidence matrix $\begin{pmatrix} 1 & 1 & 0 & 0 & 0 & 0 & 0 & 0 & 0 \\ 1 & 0 & 1 & 1 & 0 & 0 & 0 & 0 & 0 \\ 0 & 0 & 1 & 0 & 1 & 1 & 1 & 0 & 0 \\ 0 & 0 & 0 & 0 & 1 & 0 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 & 0 & 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & 0 & 0 & 1 & 0 & 0 & 0 \\ 0 & 0 & 0 & 1 & 0 & 0 & 1 & 0 & 0 \\ 0 & 0 & 0 & 0 & 0 & 0 & 0 & 1 & 1 \\ 0 & 0 & 0 & 0 & 0 & 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & 0 & 0 & 0 & 0 & 0 & 1 \end{pmatrix}$, where the row number n corresponds to vertex n, draw a BFS tree rooted at vertex 4. Identify the parent child relation for each vertex and write the level of each vertex.

Question 3. For the graph with adjacency matrix $\begin{pmatrix} 0 & 1 & 1 & 0 & 0 & 0 & 0 & 0 & 0 \\ 1 & 0 & 1 & 0 & 0 & 0 & 1 & 0 & 0 \\ 1 & 1 & 0 & 0 & 1 & 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & 0 & 0 & 0 & 0 & 1 & 0 \\ 0 & 0 & 1 & 0 & 0 & 0 & 0 & 0 & 0 \\ 0 & 0 & 0 & 0 & 0 & 0 & 1 & 0 & 0 \\ 0 & 1 & 0 & 0 & 0 & 1 & 0 & 0 & 0 \\ 0 & 0 & 0 & 1 & 0 & 0 & 0 & 0 & 1 \\ 0 & 0 & 0 & 0 & 0 & 0 & 0 & 1 & 0 \end{pmatrix}$, where the row number n corresponds to vertex n, draw a BFS tree rooted at vertex 2. Identify the parent child relation for each vertex and write the level of each vertex.

Question 4. Argue that in a connected graph G with a breadth-first search tree T each edge $e \in E(G) \setminus E(T)$ (i.e. non-tree edges) connect vertices that are at most one level apart.

Question 5. Suppose G is a connect graph with n vertices and $n-1$. Is G necessarily a tree?
